

# JOLLY PHONICS

**NPS Kengeri Junior Wing** is a vision intending to bridge a holistic development in children and acknowledges a factual reality emphasizing language building skills in English from a younger age. Hence ‘Jolly Phonics’, a comprehensive Literacy program is adapted.

This is an updated teaching method based on systematic synthesis through phonemes approach which enables children to develop reading and writing skills in English language right from the early years. This programme continues further enhancing the essentials of grammar, spelling, pronunciation and fluency in English language. This teaching technique is widely considered as one of the most effective-way of improving English skills.

The levels are split according to the age-appropriate cognitive development of children. This method also helps to measure the age-appropriate development of language and assist in identifying the necessary teaching aid from a tender age and thereby rectifying any learning difficulties in children.

The educators at our institution have been proudly executing this teaching from its foundational years and has significantly differentiated towards making a student-centered learning successful.
