

A glowing red sign with the words "ON AIR" in white, outlined letters. The sign is surrounded by a soft red and yellow glow, suggesting it is lit up. It is positioned in the top right corner of the page, within a blue neon border.

Story Podcast

At NPS Junior Wing, we incorporate value-based stories every month. Teachers put an extra effort in recording the age appropriate stories with simple language. We have many such in house pod cast stories, to name a few .. Magical handkerchief, Seeds story, The giving tree and many more.

If there is a special event or festival during any month, we ensure to tell a story related to that festival, helping children learn both the values and the significance of the festival .

Podcast stories for kindergarten often feature fun characters, playful language, sound effects, and music to make them more entertaining. Listening to these stories helps enhance concentration and attention span, as children learn to focus on the narrative, follow along with the plot, and anticipate what happens next.

This practice also improves their sitting tolerance—the ability to stay seated and engaged for longer periods, which is a crucial skill for classroom learning and other structured activities. By combining storytelling with captivating audio elements, podcast stories offer a fun and effective way to develop these essential skills in early childhood.

As per the National Education Policy (NEP) 2020 in India, podcast stories for children align with several key objectives to enhance early childhood education.
